Tour of Climate Change Study in Marcell Experimental Forest

Tuesday July 19, 2016 beginning at 10 am

SPRUCE

Spruce and Peatland Responses Under Climate and Environmental Change Experiment

- WHAT:** An unprecedented global warming experiment in northern Minnesota located within the Marcell Experimental Forest that measures how peat land ecosystems respond to changing temperatures.
- WHERE:** Google map “One Spring Lake Road, Bovey, MN” which is 2.8 miles from the Marcell Research Center. It will take 40 minutes to drive from the DFL Headquarters where carpooling begins (leaving at 9 am).
- WHO:** Researcher Paul Hanson with the Oak Ridge National Laboratory will guide the 1 – 1.5 hour tour of a group limited to twenty (20).
- MORE INFO:** <http://mnspruce.ornl.gov> AND http://www.nrs.fs.fed.us/disturbance/climate_change/spruce/

RSVP TO dfltroutlake@gmail.com OR 245-2057

Group limited to 20
